she is married some trifling thing bor-rowed from a lady friend, and all chesen may be two, or even three days know that "blessed is the bride on old. The first thing the bees do to its cell by cutting away the partition walls of three adjacent cells, throwing them into a single apartment. third cells are destroyed, and all the ordinary final removed The maggot is then supplied with a different find, slight scidity and astri The embryo bee which has from the ranks and anointed qu She is royally supplied with a supers She is generally retained prisoner by

her own power within the hive.

The bees generally provide again the simultaneous emergence of the several queens which they rear, by selecting larvæ in different stages of devel ponent. Occasionally, however, two queens come out at once. They som meet as they wander over the comb in seach of royal cells. When this is the case the workers, who under every other combination of circonstances defend their queens with their very lives, draw back, clear a space, and watch to see the result of the royal combat. The two queens rush upon each other, they grapple, and each endveavors to sting her untagemist fatelly. If they happen to get into such a position that the thrust before she goes to the church, so a must not again be left questless; priglove or some or other article is put vate animosity must yield in favor of the public went. They, however soon rush again at each other. Finally one or the other gains such an advan unlucky if the wife does not weep on tage that she can destroy her rival without forfeiting her own life, and she will allow beself to be torn limb from limb rather than are it on any but a royal antagonid. - [From April
